Sukuk

SUKUK

Since entering the sukuk (lease certificate) market for the first time in Turkey in 2010, Kuveyt Trk, which continues to hold a leading position, executed 32 domestic issuances amounting to 15.1 billion TL in the first half of 2024. Furthermore, within the framework of the CP Program established in 2023, the bank has issued two international bonds valued at 600 million TL and \$50 million respectively. (Number of Sukuk: 32). Over the years, Kuveyt Trk has issued sukuk certificates in various currencies such as Turkish Lira, US Dollar (USD), and Malaysian Ringgit (MYR) both domestically and internationally, totaling 82.3 billion TRY, 3.5 billion USD, and 800 million MYR respectively. Some portions of these issuances are currently in circulation, with 12.3 billion TRY - 25 certificates and 450 million USD - 3 certificates.

In 2021, Kuveyt Trk accomplished another milestone by issuing the world's first Sustainable Capital-Like Sukuk with a 5-year tenure and 350 million USD value. This issuance received strong demand from over 150 investors from a wide geographical area including Gulf, Asia, Europe, and America. The demand reaching 12.3 times the issuance amount, is a strong reflection of the Bank's robust credibility both internationally and locally. This issuance set a record in the Turkish market by receiving the highest demand and achieving the lowest pricing since 2017. Due to its Environmental, Social,

and Governance (ESG) structure, the issuance also attracted significant interest from green funds based in Europe and the United Kingdom.

As a result of the successful issuance, our bank was honored with three international awards in 2022:

IFN 2022 Deal of the Year Award
Bonds, Loans & Sukuk Middle East 2022 FI Deal of the Year Award
Bonds, Loans & Sukuk Turkey

Kuveyt Trk has established a new benchmark in Trkiye by issuing a 600 million Turkish Lira bond in the international market as part of its CP Program in 2024.
